

# Accelerate Application Modernization with CAST and AWS

“Tired of lift-and-shift?”

“Are you in analysis paralysis trying to modernize an overwhelming number of applications?”

“Lost in modernizing a black-box custom application?”

## CAST and AWS are partnering on application modernization

By revealing automatically the detailed innerworkings of hundreds of custom applications or millions of lines of code in a week, CAST software intelligence makes application migration & modernization planning **3x-4x faster**, execution **25% faster** and **safer**. CAST technology covers 50+ languages, 12+ databases, 100s of development frameworks.

### CAST Highlight

Rapid insights across your entire portfolio

Migration & modernization roadmap in 4 Waves. Gartner 5R. Cloud Maturity. Cloud Blockers. Remediation effort estimates. Recommended AWS cloud-native services. Operational in a week across hundreds of applications.

### CAST Imaging

Deep insights into your application's inner workings

The living knowledge base of your software internals. Automated. Find the answers that you need in minutes, instead of days.

## Benefits of Modernization

Rapid Access to Innovation

Improved Security

Lower Licensing and Consumption Costs

Increased Flexibility

Industry-leading Performance

AWS offers cash and CAST products at **no cost** for Automated Modernization Viability Assessments\*.

**Accelerate assessments. Show a modernization path. De-risk and speed-up execution.**
